VISION PEOPLE CHANNELSALES

VisionWebShop

The standard .Net based Web shop for Microsoft Dynamics[™] NAV

- Get the benefits of a web shop build for Microsoft Dynamics NAV
- Be online with real time data
- Take your business everywhere!

REQUIREMENTS: Windows 2003 server with Microsoft .Net Framework 3.5, Internet Information Server and Microsoft Message Queue SQL Server (Express Edition can be used) Min 2 GB Ram and 2 GHz server. NAV Components: Change Log, Application Server, VisionConnector and VisionWebShop Also applicable to Microsoft Dynamics NAV Native database. VisionWebShop uses VisionConnector technology for data transfer.

With VisionWebShop you get:

- · Standard web shop functionality based on .Net
- · Access to data and functionality from Microsoft Dynamics NAV
- Maintenance of pages, pictures, prices and product lists from Microsoft Dynamics NAV
- Multi languages, multi currencies and VAT
- Easy customization of design and functionality

Pages, images, prices and product lists are maintained in Microsoft Dynamics NAV

	Description	Unit Price Discount	Purchase
	Bicycle	3,675.00 £ 2.00 %	[BUY]
	Touring Bicycle	5,000.00 £	BUY
	Front Wheel	1,250.00 £	BUY
	Rim	1.44 £	BUY
	Spokes	0.00 £	BUY
	Front Hub	625.00 £	BUY
	Axle Front Wheel	0.00 £	BUY

There are several ways to show additional products to the customer:

- Related products. For every product, related products can be defined.
- Others also bought. A periodic activity count of what other buyers also bought
- Most popular products. A periodic activity count of the most popular items.
- Products on sale. Products marked as "on sale" with a new price. Both the old and the new price can be shown.

E-mails are maintained in Microsoft Dynamics NAV with possibility of multiple languages

The standard web shop includes the following: Create User, Forgot Password, Order Confirmation, Shipment, Invoice, Reports (Statement, Customer/Item Sales and Customer - Order Detail). It is also possible to attach files.

From the web shop, you have access to relevant data and functionality from your Microsoft Dynamics NAV business management solution.

Multiple languages are supported. Captions from Microsoft Dynamics NAV are used to minimize translations - other texts are translated from Microsoft Dynamics NAV.

Multiple currencies are also supported with sales prices and using Microsoft Dynamics NAV price logic.

VAT is supported with the VAT settings in Navision, and customers will be created with the appropriate VAT settings defined from the selected Country/Region.

Maintenance of content in Microsoft Dynamics NAV

All pages are maintained as categories in Microsoft Dynamics NAV where the page hierarchy and page content are edited. By associating a product to one or more categories, the product will be shown in the web shop.

Category Code	Description	Resource	Exclude f	Web ena	Active fr.
Def	Forside	VR000126		~	
Bikes	Bikes	VR000128		~	
Π	IT Equipment			~	
Computers	Computers	VR000030		~	
Furniture	Furniture			~	
Search	Search	VR000129		~	
Basket	Edit basket			~	
UserInfo	User information		~	~	
Shipment	Shipment information		~	~	
Details	Order details		~	~	
1					+

To ensure high performance, static data (such as categories, products and setup) is synchronized from Microsoft Dynamics NAV to a SQL database.

Search engine optimized

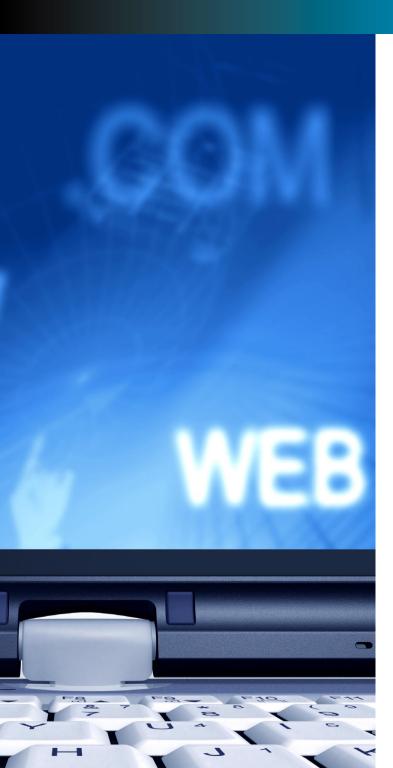

VisionWebShop uses rewriting to ensure unique and search engine friendly URL's. Even pages in different languages are supported with a unique URL.

Easy development of individual functionality

Everything in VisionWebShop is based on templates which can be easily edited by a web designer or in some cases, a .Net developer.

The design of the web shop can be changed without problems to match the company profile. Changes in the design of the web shop can be made in the template based files by a web designer in HTML.

A .Net developer can change the logic in the web shop and add new functions.

VISIONPEOPLE CHANNELSALES

Standardized and flexible

All controls and templates are based on and compliant to the XHTML 1.1 standard.

If necessary, all generated HTML markups can be modified to fit almost every design and requirement.
